

The Most Trusted, Transparent & Extensible AI Coding
Platform

erwinpasia@gmail.com

Multi-Agent, Multi-LLM Orchestration for Enterprise Development

Current AI Coding Tools Fall Short for Enterprise

Unchecked Code Volume

Without quality assurance mechanisms

Lack of Transparency

Black box AI decision-making processes

Limited Extensibility

No customization for specific needs

No Audit Trails

Critical for regulated industries

Single-Agent Limitations

Insufficient for complex enterprise tasks

\$4.9B

Market Size 2024

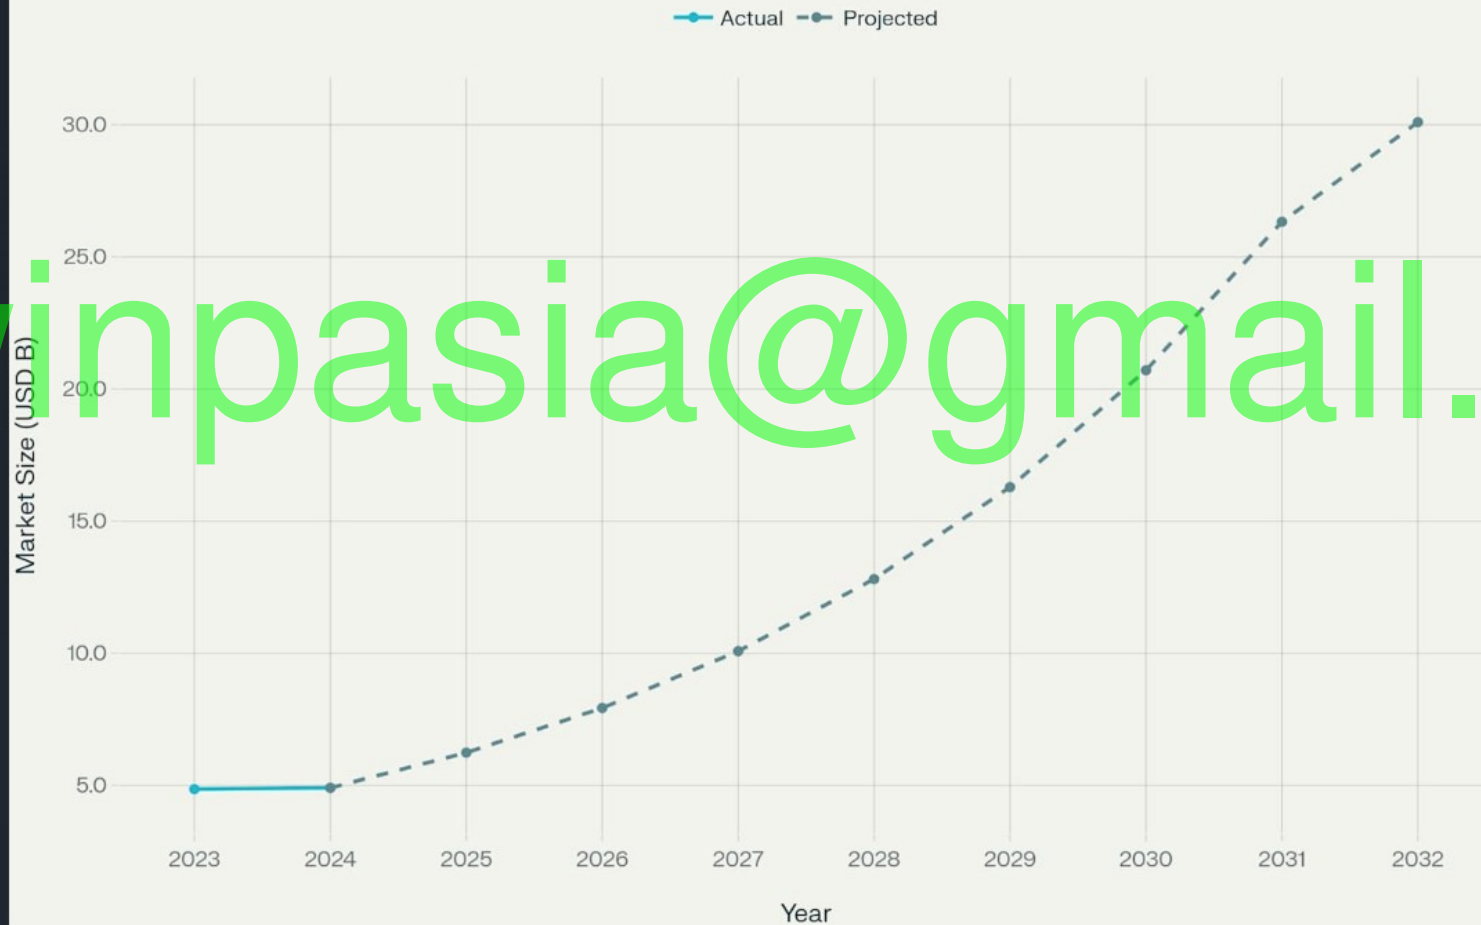

\$30.1B

Projected 2032

OmniCoder: Multi-Agent AI Code Orchestration

Multi-Agent System

Developer, Reviewer, Security, Performance, Quality agents

Multi-LLM Support

Best model for each specific task

Full Audit Trails

Complete transparency and traceability

Enterprise Compliance

SOC2, HIPAA, ISO, GDPR ready

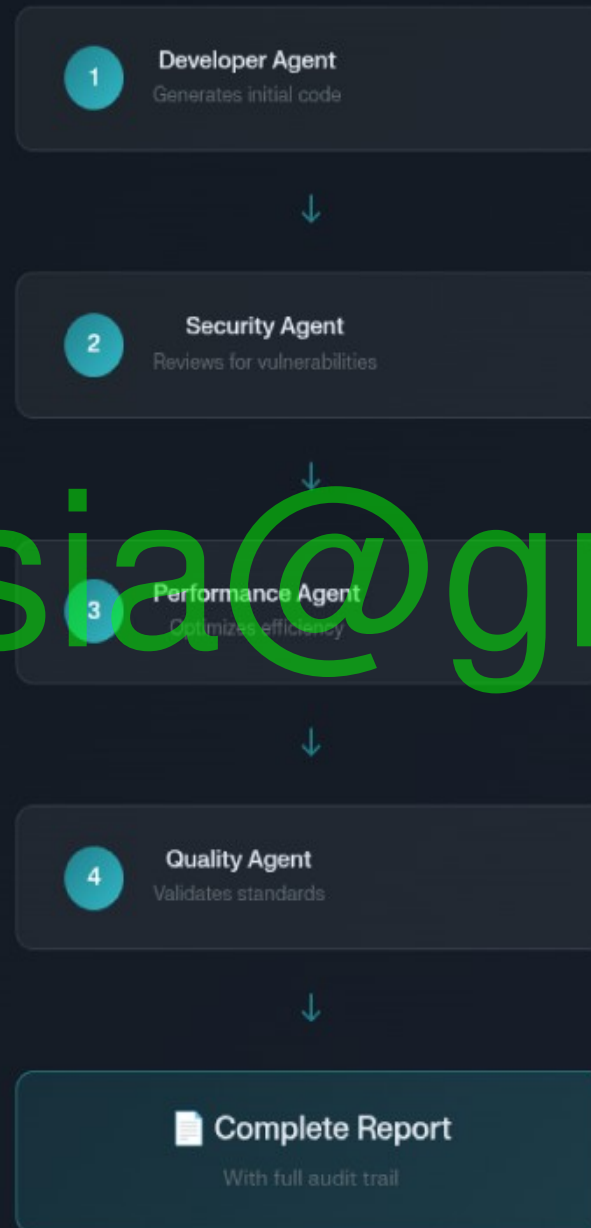

Extensible Architecture

Plugin system for custom workflows

Multi-Agent Workflow

What Sets Us Apart

Feature	OmniCoder	Copilot/Cursor
Multi-Agent System	✓	✗
Multi-LLM Support	✓	✗
Audit Trails	✓	✗
Enterprise Compliance	✓	✗
Transparency	✓	✗

Enterprise-First Approach

Enterprise Software Teams

Regulated sectors requiring compliance

DevSecOps Organizations

Security-first development practices

Educational Institutions

Teaching responsible AI development

Open-Source Maintainers

Quality assurance for public projects

Consultancies

System integrators and service providers
